## What is an academic resume

An academic resume is not your typical resume. Often referred to as a Curriculum Vitae (CV), an academic resume is designed to showcase your academic experience and accomplishments. While crafting an academic resume isn't difficult, you must include specific information to get the attention of hiring staff and help you land your desired position. You may only get one chance to impress, so having a top-notch academic resume is a must. Below is the information needed to create your academic resume, academic skills, and how a resume writing service can help you create the perfect academic resume. If you're an employer looking to fill a position, check out our list of the best free job posting sites. What Is Unique About An Academic Resume? An academic resume is also called a Curriculum Vitae (CV). Think of a CV as a more comprehensive resume that dives deeper into your experiences. An academic CV is often much longer than a traditional resume, typically several pages long. University or college faculty roles or research positions are ultra-competitive. An academic CV is primarily credential-focused. Because of that, it should include a more detailed look at your past experiences, teaching experience, relevant associations, awards, grants and fellowships, and other pertinent information. What Should Be Included On An Academic Resume? An academic resume should include detailed information about your experience and credentials relevant to working in an academic setting. Below are some of the specific sections to include on an academic resume. Start your resume by including your name and contact information at the top in the header section. Include information like your name, address, email, and phone number. Use the resume summary section to share highlights of your academic and professional accomplishments briefly. Think in terms of the specific role you're applying for and highlight the achievements that directly apply. You don't need to include everything here since it's only a summary. EDUCATION Your many academic roles have specific degree prerequisites, nailing the education section of an academic resume is crucial. List your educational experience in reverse chronological order, starting with your most recent degree earned or experience. List the college or university name, location (city, state), graduation date, your major, and the degree earned with each entry. You can also include other relevant information like your GPA, academic honors, and dissertation or thesis title. EMPLOYMENT HISTORY List your employment history, starting with your most recent experience and work backward. Because this is an academic resume, only include academic-related tenure-track work experiences. Depending on your specific experience, you could label this section as "Teaching Experience" or create a separate section for other teaching roles you've held. For each listing, include your position, the institution, department, dates worked, and a description of your responsibilities or duties. Unlike a traditional resume, refrain from creating a bulleted list of your duties. In an academic CV, include more detailed information to provide more context of your experience. PUBLICATIONS Use this section to list any of your research that has been published, which helps to position you as an expert in your particular field. Divide your publications into peer-reviewed and other publications, organized by publication date. You can break publications down further into subsections such as books, book chapters, journals, and other distinctions if desired. GRANTS AND FELLOWSHIPS 14000+ subscribers Breaking their careers to win at work and life. Create another section on your resume if you've been awarded any grants or fellowships for research projects. Since receiving grant funding is competitive, including this information will showcase your accomplishments to the right people. To list grants or fellowships, include the institution name, title, the grant or fellowship received, and the project dates. You can also include the amount awarded if you would like. AWARDS AND HONORS If you've won any awards related to your academic field, include them in a separate section. List the award name, the granting institution, and the date(s) received. RESEARCH EXPERIENCE If you have experience as a research assistant, list any research projects in this section. Include the research project name, position held, institution name, and dates. Also include a description of the research and any tasks you participated in on the project. Depending on your experience, there could be other information you'll want to include in your academic resume or CV. Perhaps you've been invited to speak on your area of expertise or participated in conferences or events related to your field of study. If that's the case, create a separate section to include this information. REFERENCES In a traditional resume, you typically don't include references or make them available upon request. That's not the case with an academic resume. It's extremely helpful to include relevant references when trying to land an academic role. Include the reference's name, title, mailing address, phone number, and email address. Related: How To List References On Your Resume What Should Be Left Off An Academic Resume? Just because an academic resume or CV is meant to be longer doesn't mean you need to include every detail of your life. Work and other experience outside of the academic setting are out of place on an academic resume and shouldn't be included. Important Job Skills For Academic Resumes An academic CV typically doesn't include a skills section. If you end up including one, only include skills that directly apply to your field of study. Here are some academic skills you could include on your resume. Analysis Collaboration Critical thinking Design thinking Foreign languages Information management Interpersonal communication Leadership Oral communication Organization Peer review Planning Problem-solving Project management Public Speaking Research Scientific writing Statistical analysis Time management Web development Written communication Frequently Asked Questions How many pages should an academic resume be? There's no set length for an academic resume, although typically, they can be several pages or longer. What are good academic skills? Important academic skills include research, teamwork, analysis, project management, written and oral communication, and organization. How do you write academic skills on a CV? Although an academic CV typically doesn't include a skills section, you could include this optional section towards the end of your resume. Typically skills are written as a bulleted list. What should an academic resume include? A professional academic resume should include a summary, education and work experience, teaching experience, publications, awards and honors, grants and fellowships, references, and other relevant information. Having a professional-looking academic resume is a surefire way to get the right people's attention when looking for a job in an academic setting. A resume writing service can help if you're unsure exactly what information to include or how to format your academic resume. An academic resume, also known as an academic CV or curriculum vitae, is a comprehensive document that highlights a person's academic background, research experience, teaching experience, and other relevant skills and achievements. It is an essential tool for academics, researchers, and students who are applying for jobs, scholarships, or fellowships in academia. In today's competitive job market, a well-crafted academic resume can make all the difference in getting noticed by potential employers or funding agencies. Unlike a traditional resume, an academic resume is typically longer and more detailed, with a focus on showcasing a person's academic credentials, research experience, and publications. It is often used to apply for tenure-track positions, research grants, or fellowships, where the hiring committee or funding agency wants to assess the candidate's academic qualifications and potential for future research contributions. In this article, we will explore the importance of an academic resume, its key components, and how to write an effective one. We will also discuss the differences between an academic resume and a traditional resume, and provide tips on how to tailor your resume to specific job applications. Importance of an Academic Resume An academic resume is crucial for academics and researchers who want to advance their careers or secure funding for their research. It serves as a snapshot of a person's academic background, research experience, and achievements, which can help to establish their credibility and expertise in their field. Here are some reasons why an academic resume is important: It helps to establish credibility and expertise in a particular field. It showcases research experience, publications, and achievements, which are essential for tenure-track positions and research grants. It provides a comprehensive overview of a person's academic background, including education, research experience, and teaching experience. It helps to differentiate oneself from other candidates in a competitive job market. It is often required for job applications, research grants, and fellowships in academia. Key Components of an Academic Resume An academic resume typically includes the following key components: Contact Information Contact information should include your name, address, phone number, and email address. Make sure to include a professional email address and a LinkedIn profile or other relevant social media links. Here is an example of how to format your contact information: Name: John Doe Address: 123 Main St, Anytown, USA 12345 Phone: (123) 456-7890 Email: johndoe@email.com Education Education should include your highest degree earned, including the institution, degree, and date of completion. If you have multiple degrees, list them in reverse chronological order. (See Also: How to Create a Basic Resume? Land Your Dream Job) Here is an example of how to format your education: Ph.D. in Computer Science, Stanford University, 2010 M.S. in Computer Science, Stanford University, 2008 B.S. in Computer Science, University of California, Berkeley, 2006 Research Experience Research experience should include a brief description of your research projects, including the research question, methodology, and findings. If you have multiple research projects, list them in reverse chronological order. Here is an example of how to format your research experience: Research Assistant, Stanford University, 2010-2012 Conducted research on machine learning algorithms for image recognition. Published two papers in top-tier conferences. Research Intern, Google, 2008-2009 Worked on a project to develop a new search algorithm. Presented research at an conference. Teaching Experience Teaching experience should include a brief description of your teaching experience, including the course(s) you taught, the institution, and the dates of teaching. Here is an example of how to format your teaching experience: Teaching Assistant, Stanford University, 2010-2012 Taught a course on machine learning. Developed and graded assignments. Lecturer, University of California, Berkeley, 2008-2009 Taught a course on computer science. Developed and graded assignments. Publications Publications should include a list of your published papers, including the title, authors, journal or conference, and date of publication. Here is an example of how to format your publications: "Machine Learning for Image Recognition," John Doe, IEEE Transactions on Pattern Analysis and Machine Intelligence, 2012. "A New Search Algorithm," John Doe, Google Research, 2009. Writing an Effective Academic Resume Writing an effective academic resume requires careful attention to detail and a clear understanding of the key components. Here are some tips to help you write an effective academic resume: (See Also: How Do I Make a Resume on Google Docs? A Step-by-Step Guide) Use a Clear and Concise Format Use a clear and concise format to make your resume easy to read. Use bullet points and headings to break up the text and make it easier to scan. Highlight Your Achievements Highlight your achievements and accomplishments, rather than just listing your responsibilities. Use specific numbers and metrics to demonstrate the impact of your work. Tailor Your Resume to the Job Tailor your resume to the specific job you are applying for. Use language from the job posting to highlight the skills and qualifications that match the job requirements. Get Feedback Get feedback from colleagues and mentors on your resume. Ask them to review your resume and provide feedback on its clarity, concision, and effectiveness. Use Action Verbs Use action verbs such as "conducted," "developed," and "published" to describe your research experience and achievements. Use a Professional Font and Layout Use a professional font and layout to make your resume look polished and professional. Avoid using fonts that are too ornate or difficult to read. Conclusion An academic resume is a crucial tool for academics and researchers who want to advance their careers or secure funding for their research. By understanding the key components of an academic resume and how to write an effective one, you can increase your chances of getting noticed by potential employers or funding agencies. Recap In this article, we discussed the importance of an academic resume, its key components, and how to write an effective one. We also discussed the differences between an academic resume and a traditional resume, and provided tips on how to tailor your resume to specific job applications. (See Also: What Do You Put For Summary On Resume? - Crafting A Killer Opener) Frequently Asked Questions What is the difference between an academic resume and a traditional resume? An academic resume is typically longer and more detailed than a traditional resume, with a focus on showcasing a person's academic credentials, research experience, and publications. A traditional resume, on the other hand, is typically shorter and more concise, with a focus on highlighting a person's work experience and skills. How long should an academic resume be? An academic resume can be anywhere from 2-5 pages in length, depending on the level of detail and the number of publications and research projects. The key is to make sure that your resume is clear and concise, while still showcasing your achievements and qualifications. What should I include in my academic resume? Include your contact information, education, research experience, teaching experience, publications, and any other relevant skills or achievements. Make sure to tailor your resume to the specific job you're applying for, and use language from the job posting to highlight your qualifications. How do I tailor my academic resume to a specific job? Read the job posting carefully and identify the key qualifications and skills required for the job. Use language from the job posting to highlight your qualifications and achievements, and make sure to tailor your resume to the specific job requirements. What is the most important thing to include in an academic resume? The most important thing to include in an academic resume is your research experience and achievements. This is what sets you apart from other candidates and demonstrates your expertise and qualifications in your field. Everything you need to know about the academic CV. There's the traditional resume, the European curriculum vitae (CV for short), the federal resume, and the academic CV, which is also commonly referred to as the academic resume. Confused yet? Not to worry! We recently sat down with TC Paulson, one of TopResume's senior resume writers, to learn about the differences between these all-important job-search tools. TC also walked us through the various elements and requirements of an academic resume and explained how TopResume can help you write a successful academic CV to land the interview. TopResume: Let's start with the basics. What are the main differences between a resume and a CV? TC Paulson: Resumes and CVs are more alike than you may think. Both documents contain sections to document your skills, professional work history, education, and certifications. A professional summary instead of an objective statement is usually featured at the beginning to summarize your value proposition to an employer. While there are some differences between these job-application tools — for instance, CVs sometimes have a longer page length and may include details you wouldn't find on a resume — both are crafted to feature your qualifications and experience as they relate to a specific career or job goal. In the U.S., South America, Australia, and most of Canada, this important personal-branding tool is called a resume. In Europe, Africa, Asia, New Zealand, and some parts of Canada, it is referred to as a curriculum vitae (CV) or European CV. Regardless of what you call it, both job-application documents should have a clean, easy-to-read layout and be written with a clear job target in mind. TR: What is an academic CV? How do I know if I need one? TP: If you are seeking a position in the medical, dental, academic, scientific, or research field anywhere in the world, chances are you need an academic curriculum vitae (CV). An academic CV — also commonly referred to as an academic resume — takes on a slightly different format from the traditional professional resume and CV expected by employers in the U.S., Europe, and other parts of the world. An academic resume is a credential-driven document that focuses on showcasing your contributions to a particular field of study or practice. As a result, if you decide to work with TopResume, your professional writer will place particular emphasis on your relevant education, licenses and certifications, training, publications, research accomplishments, and presentations throughout your academic CV. Unlike a resume or a curriculum vitae, an academic CV typically does not include a skills summary or qualifications profile since these types of career highlights will be presumed. As you might imagine, academic resumes are comprehensive documents that do not abide by your typical CV- or resume-page-length rules. For example, if you are a researcher with 20+ years of experience, your academic resume could be up to 15 pages long. A large portion of your academic CV may be dedicated to listing examples of the publications you've written, the presentations you've given, and the patents you've been granted for your inventions. TR: What items should be included in an academic resume? TP: An academic CV should include some of the core items you'd find on a standard resume or curriculum vitae: professional work history, education, certifications, licenses, training, languages in which you're fluent or competent, and relevant technical skills you possess. However, there are many pieces of information an employer expects to find in an academic resume that are not included in a standard resume or CV. These critical elements include, but are not limited to: a list of dissertations or your education section; residencies or fellowships you've completed; and research accomplishments, such as presentations you've given or publications you've written or been featured in. You should also highlight patents, grants, and industry-related awards you've received as well as any editorial boards, community service projects, and relevant professional associations of which you've been a member or officer. Finally, your academic CV should detail specific research skills you've honed throughout your career. TR: What if I don't have information for all of those components for an academic CV? TP: If you are in academia but you don't perform scientific laboratory research — for example, if you are a history professor — you should still use an academic CV as your primary career tool. By strategically balancing your academic contributions and activities with your subject-area and pedagogical expertise, you can ensure that college and university hiring committees will recognize your full value as an instructor. If you are in science and research but don't teach at a university, your ability as a hands-on investigative contributor to publications, industry developments, case studies, clinical trials, or other credentials should be highlighted. Conveying your contributions to patents, presentations, and grants will display your worth to organizations that compete for funds in research and development. In all areas of medicine — be it dermatology, emergency medicine, or surgery — an academic resume should be used to feature your expertise and ability to support best-practice patient care and clinical excellence. Focus on showcasing your clinical experience alongside any scholarly contributions, as well as residencies, medical-specialty expertise, and professional presentations at medical conferences. If you're unsure how to arrange the information you have to work with to demonstrate your value to a potential employer, let TopResume write your academic CV for you. TR: Is it really necessary to hire a professional service to write my academic resume? TP: You can choose to write your academic CV on your own, but a professional writing service can ensure that your document is properly formatted, contains all the essential components, and tells your career story in the best way possible. With TopResume, you will be paired with a professional writer who is familiar with the elements of a successful academic CV for your field. Our proprietary treatments, rigorous industry research, and technical testing of documents will help give you the confidence of knowing you have our collective expertise backing your application. Your academic CV is a vital part of your job search and can be the difference between finding your dream job and continuing on the hunt. Why not leave it to an expert? TR: Is there anything else I should know before deciding to use a professional writing service? TC: When your academic CV is being initially reviewed by a recruiter or hiring manager, your hard skills, quantifiable data, and general soft skills will be taken into account. If you want your writer to present you in a way that is not only accurate but also rich, you must be willing to participate in the process. My best advice: Take the time upfront to provide your academic-CV writer with the necessary material to develop an interview-winning document. If you can provide your TopResume writer with comprehensive information, quantifiable data, and specific achievements, then it will enable them to craft the best possible academic resume that will help you land the job of your dreams. As you might imagine, academic resumes are comprehensive documents that do not abide by your typical CV- or resume-page-length rules. For example, if you are a researcher with 20+ years of experience, your academic resume could be up to 15 pages long. A large portion of your academic CV may be dedicated to listing examples of the publications you've written, the presentations you've given, and the patents you've been granted for your inventions. TR: What items should be included in an academic resume? TP: An academic CV should include some of the core items you'd find on a standard resume or curriculum vitae: professional work history, education, certifications, licenses, training, languages in which you're fluent or competent, and relevant technical skills you possess. However, there are many pieces of information an employer expects to find in an academic resume that are not included in a standard resume or CV. These critical elements include, but are not limited to: a list of dissertations or your education section; residencies or fellowships you've completed; and research accomplishments, such as presentations you've given or publications you've written or been featured in. You should also highlight patents, grants, and industry-related awards you've received as well as any editorial boards, community service projects, and relevant professional associations of which you've been a member or officer. Finally, your academic CV should detail specific research skills you've honed throughout your career. TR: What if I don't have information for all of those components for an academic CV? TP: If you are in academia but you don't perform scientific laboratory research — for example, if you are a history professor — you should still use an academic CV as your primary career tool. By strategically balancing your academic contributions and activities with your subject-area and pedagogical expertise, you can ensure that college and university hiring committees will recognize your full value as an instructor. If you are in science and research but don't teach at a university, your ability as a hands-on investigative contributor to publications, industry developments, case studies, clinical trials, or other credentials should be highlighted. Conveying your contributions to patents, presentations, and grants will display your worth to organizations that compete for funds in research and development. In all areas of medicine — be it dermatology, emergency medicine, or surgery — an academic resume should be used to feature your expertise and ability to support best-practice patient care and clinical excellence. Focus on showcasing your clinical experience alongside any scholarly contributions, as well as residencies, medical-specialty expertise, and professional presentations at medical conferences. If you're unsure how to arrange the information you have to work with to demonstrate your value to a potential employer, let TopResume write your academic CV for you. TR: Is it really necessary to hire a professional service to write my academic resume? TP: You can choose to write your academic CV on your own, but a professional writing service can ensure that your document is properly formatted, contains all the essential components, and tells your career story in the best way possible. With TopResume, you will be paired with a professional writer who is familiar with the elements of a successful academic CV for your field. Our proprietary treatments, rigorous industry research, and technical testing of documents will help give you the confidence of knowing you have our collective expertise backing your application. Your academic CV is a vital part of your job search and can be the difference between finding your dream job and continuing on the hunt. Why not leave it to an expert? TR: Is there anything else I should know before deciding to use a professional writing service? TC: When your academic CV is being initially reviewed by a recruiter or hiring manager, your hard skills, quantifiable data, and general soft skills will be taken into account. If you want your writer to present you in a way that is not only accurate but also rich, you must be willing to participate in the process. My best advice: Take the time upfront to provide your academic-CV writer with the necessary material to develop an interview-winning document. If you can provide your TopResume writer with comprehensive information, quantifiable data, and specific achievements, then it will enable them to craft the best possible academic resume that will help you land the job of your dreams. Recommended Reading: In today's competitive job market, having a well-crafted academic resume can make all the difference for students and job seekers. An academic resume provides a comprehensive overview of a student or job seeker's academic achievements, experiences, and skills in a concise and professional format. The purpose of an academic resume is to showcase your academic accomplishments and experiences in a way that captures the interest of potential employers or admissions committees. This type of resume is specifically designed to highlight scholastic achievements, such as academic honors, awards, scholarships, research experience, and publications. Importance of the Academic Resume for Students and Job Seekers An academic resume can be a powerful tool for standing out in a competitive job market or academic setting. It provides both students and job seekers with the opportunity to showcase their academic achievements and demonstrate their potential value to employers or admissions committees. For students, an academic resume can be particularly advantageous when applying for internships, scholarships, or graduate school. For job seekers, a qualifications and experience as they relate to a specific career or job goal. In the U.S., South America, Australia, and most of Canada, this important personal-branding tool is called a resume. In Europe, Africa, Asia, New Zealand, and some parts of Canada, it is referred to as a curriculum vitae (CV) or European CV. Regardless of what you call it, both job-application documents should have a clean, easy-to-read layout and be written with a clear job target in mind. TR: What is an academic CV? How do I know if I need one? TP: If you are seeking a position in the medical, dental, academic, scientific, or research field anywhere in the world, chances are you need an academic curriculum vitae (CV). An academic CV — also commonly referred to as an academic resume — takes on a slightly different format from the traditional professional resume and CV expected by employers in the U.S., Europe, and other parts of the world. An academic resume is a credential-driven document that focuses on showcasing your contributions to a particular field of study or practice. As a result, if you decide to work with TopResume, your professional writer will place particular emphasis on your relevant education, licenses and certifications, training, publications, research accomplishments, and presentations throughout your academic CV. Unlike a resume or a curriculum vitae, an academic CV typically does not include a skills summary or qualifications profile since these types of career highlights will be presumed. As you might imagine, academic resumes are comprehensive documents that do not abide by your typical CV- or resume-page-length rules. For example, if you are a researcher with 20+ years of experience, your academic resume could be up to 15 pages long.
