Temenos empowers banks with AI-driven solutions to enhance customer engagement, boost operational efficiency, and accelerate innovation and growth. Our advanced technology offers capabilities within our existing products as well as AI solutions that deliver real-time insights, reduce risk, and help with decision making. Discover how our platform helps financial institutions navigate change, embrace new opportunities, and deliver smarter, faster banking. Together, we embrace the future of finance - Leading Banking Forward. Yes, we also provide solutions in Digital, Financial Crime Mitigation, AI, Data, Risk, Pricing, and much more, integrating with Temenos Core to simplify banking operations with a trusted software leader at the heart of your technology architecture. The financial industry is at a turning point. Emerging technologies, evolving regulations, and shifting customer expectations demand bold leadership. TCF'25 brought together more than 1,400 C-level executives, key decision-makers, and industry pioneers—offering a unique opportunity to gain critical insights and stay ahead of the curve. Digital banking technology transforms traditional banking by offering secure, real-time, and convenient financial services via digital platforms. It integrates AI, cloud computing, and automation to enhance customer engagement and streamline operations. Features such as digital payments, paperless onboarding, and personalized financial insights improve accessibility and efficiency for both banks and customers. Temenos SaaS supports comprehensive banking experiences, including core banking, digital channels, payments, and auxiliary capabilities to delight your customers and streamline your business. Temenos handles operations, support, management, scaling, annual updates, and upgrades, along with risk, governance, and security assurance. This alleviates the burden of running technology, allowing you to invest more in your customer relationships. It takes expertise, manpower, transition projects, up-front investments and more to maximize the benefits of the cloud. Temenos SaaS is a standardized service that provides an entirely predictable end-state for banking capabilities, offered as-a-service with the unparalleled resilience of our cloud partners. With Temenos SaaS, we allow banks in any segment to easily access the benefits of the cloud through a SaaS operating model. With our Enterprise Service, you can access pre-packaged, pre-configured, end-to-end solutions for retail, business, and payment services. Obtain proven banking accelerators within 48 hours and deliver a complete banking experience from front to back in just a few months. With Temenos SaaS, banks stay ahead with our annual update service, providing access to the latest platform value and functionality, reducing technology debt, and ensuring relevant banking services. With Temenos SaaS, you get our annual update service that is fully aligned with your organization to ensure all necessary prerequisites including testing, reflecting the mission-critical and regulated nature of banking services. To meet your governance framework requirements and business objectives, Temenos SaaS offers choice through a modular service catalogue to address resilience, governance, availability levels, security and additional environments-as-a-service. This empowers you to succeed on your terms, within the constraints that matter to your business - reinforcing our commitment to offer flexibility where needed and standardization where possible. Temenos SaaS supports banks operating under 30+ regulators, offering a bank-grade service with audit and certification suites ISO 27001 27017, 27018, STAR level 1 and 2, and AICPA SOC 1.2.3. To help you with governance, we provide the Temenos Trust Center — a portal offering support, insights, and documentation on regulatory, compliance, data, and security domains. This is vital for banks operating amid evolving governance standards. Born in Europe and present in virtually every significant market in the world, our people are true internationalists - bringing to bear in every locale the most extensive experience in banking technology, compliance and customer service. We are guided by the principles of culture, empowerment and accountability. We embrace learning and collaboration. We challenge ourselves every day to make banking better: for ourselves, our clients, their customers and our valued partners and investors. Every day, we work to lead banking forward: creating a world where financial institutions make banking easier and help people live their best financial lives. Improve efficiency, reduce risk, and elevate customer experiences with LMS. It provides support across a range of loan and account products, covering origination, decisioning and analytics to enhance risk assessment, collections and recovery, and compliance management. Deliver innovative and comprehensive banking solutions that strengthen customer relationships, with speed and efficiency. Create personalized experiences, powerful transactional capabilities and efficient processes, to optimize performance and accelerate transformation. Power payments growth with secure, real-time processing, accelerated innovation, and elevated experiences. Drive efficiency and sustainable growth with our advanced solution to reduce costs and power end-to-end transformation. Detect fraud and mitigate reputational risks while optimizing costs in line with your risk-based approach.
